

Cloud Computing & DevOps – AWS Handbook

SESSION 3

AWS S3 Static Website Hosting

Hosting Websites Without Managing Servers

Duration	2 Hours
Prerequisites	AWS Account, Basic HTML Knowledge
Learning Outcome	Create S3 Bucket, Host Static Website, Access Website URL

Why Are We Learning This?

Not every website requires a server. AWS S3 can host static websites directly, reducing cost and administration effort. This session introduces object storage and serverless website hosting.

Architecture Diagram

Key Concepts

Object Storage	Stores files as objects
S3 Bucket	Container for storing objects
Static Website	Website with fixed content
Website Endpoint	Public URL generated by S3
Object	Individual file stored in S3

Practical Activities

Activity 1: Create an S3 Bucket

Expected: Bucket Created Successfully

Activity 2: Configure Bucket for Website Hosting

Expected: Static Website Hosting Enabled

Activity 3: Upload Website Files

Expected: HTML Files Uploaded

Activity 4: Configure Public Access

Expected: Website Files Accessible

Activity 5: Access Website URL

Expected: Website Opens in Browser

Journal Writing Template

Aim

To host a static website using Amazon S3.

Theory

Amazon S3 provides object storage and supports static website hosting.

Procedure

Write 5–7 concise steps performed during the lab.

Observations

Bucket created successfully. Website hosting enabled. Website accessible through generated URL.

Conclusion

Amazon S3 was successfully used to host a static website without managing a server.

Viva Preparation

1. What is Amazon S3?
2. What is Object Storage?
3. What is a Bucket?
4. What is Static Website Hosting?
5. Difference between EC2 Hosting and S3 Hosting?

Troubleshooting Box

Problem	Possible Cause
Website not opening	Static hosting not enabled
Access Denied	Bucket policy issue
Files not visible	Objects not uploaded
404 Error	Index document missing

Industry Relevance

S3 is widely used for hosting landing pages, documentation portals, portfolios, and frontend applications. It provides a low-cost alternative to traditional web servers for static content.
